

2021

Salinity Solutions formed as a spin-out, with seed funding from Clean Engineering and £750k raised on CrowdCube.

2022

The first successful field trial of commercial prototype. A second CrowdCube campaign raises £700k.

The image shows the exterior of a modern building with a blue facade. The word "growUp" is mounted on the wall in large, 3D letters. "grow" is in a dark blue color, and "Up" is in a bright green color. Below the main facade, there is a dark grey section with a large opening that reveals the interior of a container or a small industrial unit. Inside, there is a metal frame structure with several white cylindrical tanks. One of the tanks has the "Salinity SOLUTIONS" logo on it. To the right of the opening, there is a blue panel with white text and icons, listing various water treatment processes: "Water reuse", "Effluent treatment", "Nutrient removal", and "Wastewater". The overall scene is set against a clear sky.

2023

Signs an agreement with a leading manufacturer, and starts trials with UK-based companies.

2024

Salinity signs partnership agreements in France, the UK and India, and secures investment from Chile-based SQM Lithium Ventures.

2025

Japan and India open up as markets for Salinity, and a third CrowdCube campaign is launched.
